Loop through a collection

```python
for name in ['Christopher', 'Susan']:
    print(name)
```

```
# output
Christopher
Susan
```

Looping a number of times

```python
for index in range(0, 2):
    print(index)
```

```
# output
0
1
```

Looping with a condition

```python
names = ['Christopher', 'Susan']
index = 0
while index < len(names):
    print(names[index])
    # Change the condition!!
    index = index + 1
```

```
# output
Christopher
Susan
```
